RSA Archer

Online Training Course

Course **Highlights**

- 30 hrs of Instructor-led Training
- Access to recorded sessions
- Post Training Support
- Get CPE Certificate
- Learn from Industry Experts
- Career Guidance & More

Course **Description**

Overview

The RSA Archer training course offered by InfosecTrain introduces all the essential concepts and processes required to effectively design, configure, and manage the RSA Archer platform. The course incorporates interactive and hands-on sessions where you will learn how to navigate the RSA Archer system, create applications and dashboards, troubleshoot issues, and more. The training also includes real-world case scenarios and projects to enhance your skills and prepare you for the RSA Archer certification exam. By completing this training, you will gain a foundational knowledge of RSA Archer and be equipped with the skills necessary to use the platform for GRC-related tasks.

Course Objectives

- Utilize RSA Archer to build and refine Governance, Risk, and Compliance frameworks tailored to organizational objectives.

- Identify, assess, and mitigate risks across the enterprise, enhancing strategic risk decision-making with RSA Archer's tools.

- Configure applications, workflows, and data feeds to streamline complex risk management and compliance processes.

- Generate actionable insights through RSA Archer's reporting capabilities, translating data into informed executive decisions.

- Seamlessly connect RSA Archer with SIEM, threat intelligence, and other enterprise systems for enhanced risk visibility and response.

- Track and manage incidents within RSA Archer, ensuring effective response and documentation to improve organizational resilience.

- Utilize RSA Archer to automate policy enforcement and compliance monitoring, reducing manual efforts and increasing audit readiness.

- Develop scalable risk management programs supported by RSA Archer, adapting to evolving threats and organizational growth.

- Use RSA Archer to monitor and manage third-party risks, ensuring vendor compliance aligns with internal risk thresholds.

- Enable RSA Archer to support long-term planning and resilience by transforming risk data into actionable intelligence for strategic initiatives.

- ✔ We provide complete certification-based training.

- ✔ The content is crafted with precision and care to understand the subject better.

- ✔ We have certified and highly experienced trainers with in-depth knowledge of the subject.

- ✔ Our training schedule is flexible, and we also provide recordings of the lectures.

- Design and create a data-driven event or Actions
- Configure a calculated field
- Important functions and formulas overview
- Workflow

4. Access Control

- Create a user account
- Create a group
- Create a role
- Create a record permission field
- Make a field private
- Discuss best practices for configuring access control
- Troubleshoot common access control issues

5. Reporting and Dashboards

- Reporting basics
- Global searches
- Advanced searches
- Statistics searches
- Create an iView

- Create a Dashboard
- Configure a Workspace

6. Integration

- Data Import

  - Import data into an application
  - Import data into a leveled application

- Data Feed Manager

  - Overview and basics

7. Packaging and Advance Workflow Overview

- Packaging Overview
- Advance Workflow Overview

8. Questionnaires

- Questionnaire basics
- Questionnaire exploration
- Creation of Questionnaire

9. Notifications (Overview and Basics)

- Subscription Notifications
- Scheduled Report Distributions
- On-Demand Notifications
- Admin Notifications
- Troubleshooting Notification

10. Certification Information & Resume Preparation

We offer advanced and scenario-based interview questions and answers along with RSA Archer resume samples. Take a free sample practice test before appearing in the certification to improve your chances of scoring high. Offer advanced and scenario-based interview questions.
